

# Tecnadis **SELF CLEAN** **ULTRA**

Nanotechnology-based superhydrophilic and anti-dust product for protecting both indoor and outdoor glass surfaces

SUPERHYDROPHILIC

ANTI-DUST

**TECNAN**  
TECNOLOGÍA NAVARRA DE NANOPRODUCTOS, S.L.

TREATED

UNTREATED

## Characteristics

**Tecnadis SELFCLEAN ULTRA** is an innovative *superhydrophilic and anti-dust solution* based on nanotechnology that provides self-cleaning properties to glasses, both outdoor and indoor surfaces, in which is applied.

The superhydrophilic property allows water to contact the surface creating a thin layer which dries homogeneously, avoiding the appearance of water marks, and also reduces dust adhesion.

## Advantages

### GLASS ALWAYS CLEAN

TECNADIS SELFCLEAN ULTRA REDUCES GLASSES CLEANING AND MAINTENANCE TIME.

### DOES NOT DEPEND ON SOLAR RADIATION

THE COATING IS NOT BASED ON  $\text{TiO}_2$  TECHNOLOGY, IN CONTRAST TO ITS COMPETITORS.

### OUTDOOR AND INDOOR SURFACES

APPLICABLE ON BOTH **INDOOR AND OUTDOOR** GLASSES SUCH AS SHOWER-SCREENS, WINDOWS, MIRRORS AND SOLAR PANELS, AMONG OTHER.

### TOTAL TRANSPARENCY

THE COATING DOES NOT MODIFY THE GLASS AESTHETIC CONDITIONS.

### HIGH DURABILITY

TOTAL RESISTANCE TO UV RADIATION, ATMOSPHERIC AGENTS AND CONVENTIONAL CLEANERS. AVERAGE **DURABILITY OF 3 YEARS**.

### BEST QUALITY-PRICE SOLUTION

BASED ON ITS DISTINGUISHED TECHNOLOGY, HIGH PERFORMANCE AND LOW COST, IT IS PRESENTED AS **A UNIQUE SOLUTION IN THE MARKET**.

## How To Use

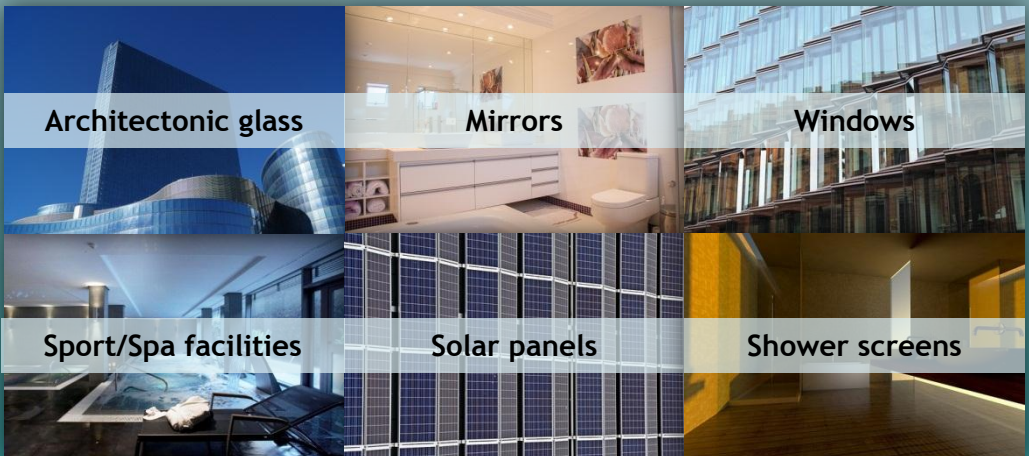

- 1. SUPPORT PREPARATION:** The surface to be treated with Tecnadis SELFCLEAN ULTRA must be clean and completely dry before application.
- 2. APPLICATION:** Spray it homogeneously on the surface, avoiding possible excesses and product's sags. Tecnadis SELFCLEAN ULTRA is very easy to apply with a gravity, suction or pressure atomization gun.

*Note: If it is desired to VERIFY that the application has been homogeneous and with total coverage, around 1 hour after the application it is possible to throw water directly over the treated surface and check the formation of the thin layer of water over the glass.*

## Multiple Applications

Applicable on both indoor and outdoor surfaces (shower-screens, windows, mirrors, solar panels etc.)

Boulevard Vitoria Hotel  
(Vitoria-Gasteiz)

Grande Covián Medical Centre  
(Zaragoza)

## Successful Applications

Abejeras Lift of Pamplona  
(Pamplona)

Alvento - Metrovacesa Business  
Park (Madrid)

AVAILABLE IN 1, 5 AND 25 LITRES
